FLOOR ZILLA

Product details

Height	approx. 20 mm
Diameter	7–20'
Material	Nonwoven fibres, foam material
Coating	VreactiV SiC
No. of pieces	3 pcs (sales unit)

Use with cleaning machines

FloorZilla cleaning pads are compatible with oscillating and rotating single disc machines as well as scrubber dryers.

Sustainable and climate neutral

Cleaning specialists use FloorZilla as a sustainable contribution to protecting the environment, as FloorZilla cleaning pads are made of recycled material and produced in Germany with net-zero carbon emissions. Dirt is removed completely without chemicals. Water consumption is reduced by up to 50%. Our customers' success is a success for everyone – sparkling floors with a demonstrable cut in CO₂ emissions by more than 33%.

MADE IN GERMANY

Flooring

FloorZilla hybrid is suitable for use on both hard and resilient flooring*:

- Natural stone
- Terrazzo
- Marble
- Screed/concrete
- Industrial flooring
- Epoxy resin
- Polyurethane
- Linoleum
- PVC

* Product compatibility must always be checked before use.

3D active elements (hybrid)

Deep-cleaning but also gentle:

The 'hybrid' coating in the VreactiV technology ensures an efficient clean while still being gentle on the flooring. The proprietary 3-layer structure distributes the contact pressure in the FloorZilla hybrid cleaning pads efficiently and evenly onto the 3D active elements. They contain silicon microgranules in a flexible binding to remove dirt without a trace.

Higher contact pressure

Not only do the 3D active elements in FloorZilla hybrid cleaning pads ensure optimised pressure distribution, they also enable increased contact pressure. The raised 3D active elements allow up to four times the contact pressure, remove even the strongest, most persistent dirt and slide easily across the floor for more comfortable work.
